

# Is Your Content Ready for the AI-Driven Search Era?

As generative AI transforms how people find and consume information, traditional SEO strategies are evolving into Generative Engine Optimisation (GEO). The question isn't whether this shift will impact your business; it's whether you're prepared to adapt. Here's a practical checklist to help you assess your current situation and identify any necessary steps to take.

## Content Strategy & Structure

- ☐ Shift to user-centric, intent-led content strategy - Does your content prioritise what your audience actually needs to know?
- ☐ Answer real client questions - Are you addressing the specific concerns and queries your prospects are asking?
- ☐ Build around pain points and success factors - Does your content speak directly to client challenges and desired outcomes?
- ☐ Use clear, scannable structures with proper headings, FAQs, summaries, and bullet points that AI can easily analyse

## Technical Foundation

- ☐ Adopt or update schema markup to clearly signal your expertise, services, and industry recognition
- ☐ Implement GEO best practices to make your content easily discoverable by AI systems
- ☐ Make content citation-ready so AI engines can reference and attribute your expertise accurately
- ☐ Standardise service descriptions with consistent headings and comprehensive content depth

## Authority & Trust Building

- ☐ Demonstrate E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness) across all content
- ☐ Address the information gap – Does your content add unique insights or detail beyond what competitors provide, giving users a reason to trust your answer?
- ☐ Publish structured case studies and client success stories that showcase real results
- ☐ Convert PDF resources to HTML with semantic markup that AI systems can understand and process

## Measurement & Optimisation

- ☐ Establish benchmarks for AI mentions, citation accuracy, and traffic attribution
- ☐ Conduct regular performance audits to identify what's working and what needs refinement
- ☐ Provide team training on AI-friendly and SEO-optimised content creation practices
- ☐ Set up structured prompt tracking to link AI prompts and queries to on-site engagement, citations, and conversions, providing clear attribution of what's working

### TIP

If this checklist feels daunting or you're unsure where to start, that's completely understandable—this represents a significant shift in how we approach digital marketing. We're here to help guide you through this transition and can handle the implementation for you, allowing you to focus on what you do best: serving your clients.
